---

The table in question is table 4-4. Tom Bateson, who revised this table, just showed it to me. He said he was able to input all his data. He also said there are some merge problems which are readily apparent. If you can do a little clean-up on table 4-4, I would appreciate it. If you have any questions about this table, I would advise you to contact Tom directly (his Email address is above).

John,

Terri requested assistance with this table last week. It just occurred to me that you probably need this since she isn't here to forward it to you. Let us know if you need any additional formatting assistance with it. We were unsure of how much merging/formatting to do.

Send any further correspondence on this request to CI NCEA TSS group.

Terri,

Attached is the table with the columns from Beane Freeman copied into the Hauptmann et al. and Wang et al. rows. When you have multiple rows and columns, it is best to copy the entire section, replacing the information in the first 3 columns that were merged.

In case you need to make further changes to the inserted rows, the left 3 columns have been split so you can paginate and merge them later.

Just to let you know, we noticed the repeat header borders were not copying to the repeat row correct (showing up as single line even though set as double line on the first page). This was due to the rows being set height. The entire table was set for standard margins (0.04 which is best for later conversion to 508 pdf) and the set height removed. This fixed the repeating border error.

Please let us know if you need additional help.

Send any further correspondence on this request to CI NCEA TSS group.

Subject: formaldehyde table

---

We need a table revised for the formaldehyde document. Information from one entry needs to be copied to two other entries.

The last four columns (Results, statistical significance) for the Beane Freeman et al. (2009) reference need to be copied to the Hauptmann et al. (2009) and Wang et al. (2009) refs. I tired copying as nested, but

that didn't work. Thanks.

Have a nice weekend.

Terri
